

Technical Data Sheet

2424e Harness Wrap Tape and Wire Isolation

2424e - Insulating tape, self-extinguishing; consists of a polyvinyl chloride base and rubber glue. The texture is dense and resistant to high temperatures. When using electrical tape, the appearance of the working surface is not disturbed, the lines of surface separation remain smooth and clean, without folds and gaps

Description	Units	Value
Thickness	mm	0.13±0.01
Length	m	15
Color	-	Black, white, red, green, yellow, blue, yellow- green, grey
Tensile strength	N/cm	28
Elongation at Break	%	230
Adhesion strength, min:	N/cm	2,5

2424e is used:

- as an insulating and protective coating for external surfaces,
- for electrical insulation of wires with shells of any type,
- for marking wires at industrial enterprises, at work and at home,
- for fastening bundles of wires in the automotive industry.
